For next week....

Add the county boundaries

In the legend you need to fix one of the WW-31s

Can you print me a copy? It will be easier for me to review that way. Thanks.

Hi Kathy,

How does this look to you?

One minor issue that I ran into...there were three points on the spreadsheet that did not have coordinates and were not a part of the data points that I converted for you last week. I got Lat/Long coordinates for those three from Bing Maps and converted them to UTM, but I consider them "approximate" since they weren't GPS'd. They are location #'s 673, 674, and 675.

Thanks!

Cheryl
